Thin Solid Films 256 (1995) 277–280

thin solid films

Subject Index of Volume 256

Aluminium oxide
aluminium porous oxide growth. On the electric conductivity of the barrier layer 101
second harmonic generation of *N*-(4-nitrophenyl)-L-prolinol-doped alumina film prepared by a sol–gel process 4
the effect of thermal annealing on the properties of thin alumina films prepared by low pressure metal–organic chemical vapour deposition 8
Amorphous materials
amorphous diamond-like carbon films—a hard anti-reflecting coating for silicon solar cells 1
irreversible photoinduced changes in the properties of amorphous $(GeS_2)_{100-x}Ga_x$ films 257
the effect of Pt impurity at the NiCr/Si interface on the growth of amorphous Cr layer during annealing 85
thermoelectric power and d.c. conductivity of co-evaporated Mn/SiO_x cermet thin films 120
Anisotropy
the photoinduced anisotropy of second harmonic generation in monolayered Langmuir–Blodgett films 176
Annealing
structural control of evaporated lead-phthalocyanine films 64
the effect of Pt impurity at the NiCr/Si interface on the growth of amorphous Cr layer during annealing 85
Atomic force microscopy
epitaxial growth of α-copper phthalocyanine crystal on Si(001) substrate by organic molecular beam deposition 262
microstructural effects in WO_3 gas-sensing films 247
morphologies of phase-separated monolayers investigated by atomic force microscopy 210

Carbon
optical and mechanical properties of carbon nitride films prepared by ion-assisted arc deposition and magnetron sputtering 148
Catalysis
catalytic properties of thin films by simultaneous oblique sputter deposition of two materials from different directions 68
Chemical vapour deposition
buckling patterns in diamond-like carbon films 94
Raman study of diamond films deposited by MPCVD: effect of the substrate position 13
the effect of thermal annealing on the properties of thin alumina films prepared by low pressure metal–organic chemical vapour deposition 8
thickness control of InP and $In_{0.53}Ga_{0.47}As$ thin films by energy-dispersive X-ray spectrometry 143
Chromium
a physical basis for irradiation-induced modification of thin-film stresses 116

Coatings
buckling patterns in diamond-like carbon films 94
the effect of thermal annealing on the properties of thin alumina films prepared by low pressure metal–organic chemical vapour deposition 8
Conductivity
transport properties in nickel phthalocyanine thin films using gold electrodes 139
Copper
lattice constant determination by grazing incidence diffraction in thin cubic films under thermal strain 39
transport properties of $CuGaSe_2$ thin films 165
Crystallization
microcrystalline structure of poly-Si films prepared by cathode-type r.f. glow discharge 234

Deposition process
deposition of uniform fullerene films by LB technique 186
dynamical deformation sensors based on thin ferroelectric PZT films 226
Diamond
amorphous diamond-like carbon films—a hard anti-reflecting coating for silicon solar cells 1
buckling patterns in diamond-like carbon films 94
Raman study of diamond films deposited by MPCVD: effect of the substrate position 13
Dielectric properties
electrical behaviour of epitaxial $SrF_2/InP(100)$ diodes 80
Dielectrics
growth of $PbTiO_3$ thin films by r.f. sputtering on vicinal MgO(100) substrates 240
phase evolution and annealing effects on the electrical properties of $Pb(Zr_{0.53}Ti_{0.47})O_3$ thin films with RuO_2 electrodes 73
Diffusion
kinetic studies of intermetallic compound formation by resistance measurements 155
the effect of Pt impurity at the NiCr/Si interface on the growth of amorphous Cr layer during annealing 85

Electrical properties and measurements
electrical behaviour of epitaxial $SrF_2/InP(100)$ diodes 80
microstructural effects in WO_3 gas-sensing films 247
phase evolution and annealing effects on the electrical properties of $Pb(Zr_{0.53}Ti_{0.47})O_3$ thin films with RuO_2 electrodes 73
thermoelectric power and d.c. conductivity of co-evaporated Mn/SiO_x cermet thin films 120
transport properties in nickel phthalocyanine thin films using gold electrodes 139
transport properties of $CuGaSe_2$ thin films 165
Electrochemistry
aluminium porous oxide growth. On the electric conductivity of the barrier layer 101

Elsevier Science S.A.

on the transition from electrodesorption of a two-phase adsorbate to 2D hole nucleation in the dissolution of HgS layers at the mercury–electrolyte interface 89
Electron diffraction
deposition of uniform fullerene films by LB technique 186
Electron microscopy
deposition of uniform fullerene films by LB technique 186
morphological changes in UHV deposited Er/a-C films: nucleation, growth and grain structure 48
Electron spin resonance
epitaxial growth of α-copper phthalocyanine crystal on Si(001) substrate by organic molecular beam deposition 262
Electronic devices
kinetics of the energy transfer between copper and two kinds of manganese centres in thin ZnS:Mn films 136
Ellipsometry
magneto-optical and optical spectroscopy in Fe/Zr multilayered films 171
microcrystalline structure of poly-Si films prepared by cathode-type r.f. glow discharge 234
Epitaxy
an X-ray diffraction study of epitaxial lithium tantalate films deposited on (0001) sapphire wafers using r.f. diode sputtering 59
Evaporation
morphological changes in UHV deposited Er/a-C films: nucleation, growth and grain structure 48
structural control of evaporated lead-phthalocyanine films 64

Fluorine
electrical behaviour of epitaxial SrF_2/InP(100) diodes 80
Fourier transform infrared spectroscopy
chemical bonding in thin Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge—an FTIR study 31
staggered aggregation structure of azobenzene-derivative ultrathin films 205
the effect of thermal annealing on the properties of thin alumina films prepared by low pressure metal–organic chemical vapour deposition 8

Germanium
chemical bonding in thin Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge—an FTIR study 31
Glass
current transport processes in In_2O_3–ZnSe–$(Zn_{1-x}Cd_xTe)_{1-y}(In_2Te_3)_y$ heterostructures 23
Glow discharge
chemical bonding in thin Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge—an FTIR study 31
microcrystalline structure of poly-Si films prepared by cathode-type r.f. glow discharge 234
Growth mechanism
aluminium porous oxide growth. On the electric conductivity of the barrier layer 101
morphological changes in UHV deposited Er/a-C films: nucleation, growth and grain structure 48

Heat treatment
structural control of evaporated lead-phthalocyanine films 64
Heterostructures
current transport processes in In_2O_3–ZnSe–$(Zn_{1-x}Cd_xTe)_{1-y}(In_2Te_3)_y$ heterostructures 23
Hydrocarbons
thermally-induced phase transitions in LB multilayers of lead stearate 198

Impurities
current transport processes in In_2O_3–ZnSe–$(Zn_{1-x}Cd_xTe)_{1-y}(In_2Te_3)_y$ heterostructures 23
Indium phosphide
thickness control of InP and $In_{0.53}Ga_{0.47}As$ thin films by energy-dispersive X-ray spectrometry 143
Infrared spectroscopy
structural studies of reactively sputtered carbon nitride thin films 44
the molecular orientation in copper phthalocyanine thin films deposited on metal film surfaces 182
Ion bombardment
a physical basis for irradiation-induced modification of thin-film stresses 116
Ion plating
low voltage–high current discharge of Ti vapour in high vacuum 124

Langmuir–Blodgett films
cation exchange in fatty acid Langmuir–Blodgett films deposited on Cu substrates 192
deposition of uniform fullerene films by LB technique 186
effects of subphase additions on optical non-linearity of hemicyanine derivative Langmuir–Blodgett monolayers 215
morphologies of phase-separated monolayers investigated by atomic force microscopy 210
staggered aggregation structure of azobenzene-derivative ultrathin films 205
the photoinduced anisotropy of second harmonic generation in monolayered Langmuir–Blodgett films 176
thermally-induced phase transitions in LB multilayers of lead stearate 198
vacuum stability of Langmuir–Blodgett films of fatty acids and fatty acid salts 220
Lanthanides
morphological changes in UHV deposited Er/a-C films: nucleation, growth and grain structure 48
Lattice parameters
an X-ray diffraction study of epitaxial lithium tantalate films deposited on (0001) sapphire wafers using r.f. diode sputtering 59
Luminescence
kinetics of the energy transfer between copper and two kinds of manganese centres in thin ZnS:Mn films 136

Magnetic properties and measurements
magneto-optical and optical spectroscopy in Fe/Zr multilayered films 171
Manganese
kinetics of the energy transfer between copper and two kinds of manganese centres in thin ZnS:Mn films 136
Metal-oxide semiconductor structure
on the frequency loss of metal-oxide–semiconductor structures under depletion and weak inversion 253

Monolayers
the photoinduced anisotropy of second harmonic generation in monolayered Langmuir–Blodgett films 176
vacuum stability of Langmuir–Blodgett films of fatty acids and fatty acid salts 220
Molecular beam epitaxy
epitaxial growth of α-copper phthalocyanine crystal on Si(001) substrate by organic molecular beam deposition 262
Multilayers
magneto-optical and optical spectroscopy in Fe/Zr multilayered films 171
on the transition from electrodesorption of a two-phase adsorbate to 2D hole nucleation in the dissolution of HgS layers at the mercury–electrolyte interface 89
vacuum stability of Langmuir–Blodgett films of fatty acids and fatty acid salts 220

Nanostructures
scanning tunneling topography and spectroscopy of silver on graphite 268
Nitric oxide
catalytic properties of thin films by simultaneous oblique sputter deposition of two materials from different directions 68
Nitrides
low temperature nitridation of transition metals with hydrazine 106
optical and mechanical properties of carbon nitride films prepared by ion-assisted arc deposition and magnetron sputtering 148
structural studies of reactively sputtered carbon nitride thin films 44
Nucleation
kinetic studies of intermetallic compound formation by resistance measurements 155
on the transition from electrodesorption of a two-phase adsorbate to 2D hole nucleation in the dissolution of HgS layers at the mercury–electrolyte interface 89

Optical coatings
amorphous diamond-like carbon films—a hard anti-reflecting coating for silicon solar cells 1
Optical properties
effects of subphase additions on optical non-linearity of hemicyanine derivative Langmuir–Blodgett monolayers 215
irreversible photoinduced changes in the properties of amorphous $(GeS_2)_{100-x}Ga_x$ films 257
magneto-optical and optical spectroscopy in Fe/Zr multilayered films 171
optical and mechanical properties of carbon nitride films prepared by ion-assisted arc deposition and magnetron sputtering 148
second harmonic generation of *N*-(4-nitrophenyl)-L-prolinol-doped alumina film prepared by a sol–gel process 4
Organic substances
the molecular orientation in copper phthalocyanine thin films deposited on metal film surfaces 182
transport properties in nickel phthalocyanine thin films using gold electrodes 139
Organometellic vapour deposition
chemical bonding in thin Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge—an FTIR study 31

Phase transitions
irreversible photoinduced changes in the properties of amorphous $(GeS_2)_{100-x}Ga_x$ films 257
Piezoelectric effect
dynamical deformation sensors based on thin ferroelectric PZT films 226
Platinum
catalytic properties of thin films by simultaneous oblique sputter deposition of two materials from different directions 68

Radiation damage
a physical basis for irradiation-induced modification of thin-film stresses 116
Raman scattering
Raman study of diamond films deposited by MPCVD: effect of the substrate position 13
structural studies of reactively sputtered carbon nitride thin films 44
Reaction kinetics
the effect of Pt impurity at the NiCr/Si interface on the growth of amorphous Cr layer during annealing 85
Resistivity
kinetic studies of intermetallic compound formation by resistance measurements 155
Ruthenium
phase evolution and annealing effects on the electrical properties of $Pb(Zr_{0.53}Ti_{0.47})O_3$ thin films with RuO_2 electrodes 73

Scanning electron microscopy
thickness control of InP and $In_{0.53}Ga_{0.47}As$ thin films by energy-dispersive X-ray spectrometry 143
Scanning tunnelling microscopy
scanning tunneling topography and spectroscopy of silver on graphite 268
Second harmonic generation
effects of subphase additions on optical non-linearity of hemicyanine derivative Langmuir–Blodgett monolayers 215
second harmonic generation of *N*-(4-nitrophenyl)-L-prolinol-doped alumina film prepared by a sol–gel process 4
the photoinduced anisotropy of second harmonic generation in monolayered Langmuir–Blodgett films 176
Selenides
transport properties of $CuGaSe_2$ thin films 165
Semiconductors
aluminium porous oxide growth. On the electric conductivity of the barrier layer 101
on the frequency loss of metal-oxide–semiconductor structures under depletion and weak inversion 253
transport properties of $CuGaSe_2$ thin films 165
Sensors
dynamical deformation sensors based on thin ferroelectric PZT films 226
microstructural effects in WO_3 gas-sensing films 247
Silicides
kinetic studies of intermetallic compound formation by resistance measurements 155
Silicon nitride
low temperature nitridation of transition metals with hydrazine 106
Silicon oxide
on the frequency loss of metal-oxide–semiconductor structures under depletion and weak inversion 253

thermoelectric power and d.c. conductivity of co-evaporated Mn/SiO_x cermet thin films 120
Silver
scanning tunneling topography and spectroscopy of silver on graphite 268
Solid phase epitaxy
growth of $PbTiO_3$ thin films by r.f. sputtering on vicinal MgO(100) substrates 240
Solar cells
amorphous diamond-like carbon films—a hard anti-reflecting coating for silicon solar cells 1
Sputtering
an X-ray diffraction study of epitaxial lithium tantalate films deposited on (0001) sapphire wafers using r.f. diode sputtering 59
catalytic properties of thin films by simultaneous oblique sputter deposition of two materials from different directions 68
dynamical deformation sensors based on thin ferroelectric PZT films 226
growth of $PbTiO_3$ thin films by r.f. sputtering on vicinal MgO(100) substrates 240
optical and mechanical properties of carbon nitride films prepared by ion-assisted arc deposition and magnetron sputtering 148
structural studies of reactively sputtered carbon nitride thin films 44
Stress
a physical basis for irradiation-induced modification of thin-film stresses 116
lattice constant determination by grazing incidence diffraction in thin cubic films under thermal strain 39
Strontium
electrical behaviour of epitaxial SrF_2/InP(100) diodes 80
Structural properties
irreversible photoinduced changes in the properties of amorphous $(GeS_2)_{100-x}Ga_x$ films 257
staggered aggregation structure of azobenzene-derivative ultrathin films 205
the molecular orientation in copper phthalocyanine thin films deposited on metal film surfaces 182
Sulphides
on the transition from electrodesorption of a two-phase adsorbate to 2D hole nucleation in the dissolution of HgS layers at the mercury–electrolyte interface 89
Surface and interface states
morphologies of phase-separated monolayers investigated by atomic force microscopy 210
on the frequency loss of metal-oxide–semiconductor structures under depletion and weak inversion 253
second harmonic generation of *N*-(4-nitrophenyl)-L-prolinol-doped alumina film prepared by a sol–gel process 4
Surface morphology
morphologies of phase-separated monolayers investigated by atomic force microscopy 210
phase evolution and annealing effects on the electrical properties of $Pb(Zr_{0.53}Ti_{0.47})O_3$ thin films with RuO_2 electrodes 73

Titanium
low voltage–high current discharge of Ti vapour in high vacuum 124
Titanium nitride
low temperature nitridation of transition metals with hydrazine 106
Tribology
buckling patterns in diamond-like carbon films 94
Tungsten oxide
microstructural effects in WO_3 gas-sensing films 247

X-ray absorption
thickness control of InP and $In_{0.53}Ga_{0.47}As$ thin films by energy-dispersive X-ray spectrometry 143
X-ray diffraction
an X-ray diffraction study of epitaxial lithium tantalate films deposited on (0001) sapphire wafers using r.f. diode sputtering 59
epitaxial growth of α-copper phthalocyanine crystal on Si(001) substrate by organic molecular beam deposition 262
growth of $PbTiO_3$ thin films by r.f. sputtering on vicinal MgO(100) substrates 240
microcrystalline structure of poly-Si films prepared by cathode-type r.f. glow discharge 234
staggered aggregation structure of azobenzene-derivative ultrathin films 205
structural control of evaporated lead-phthalocyanine films 64
the molecular orientation in copper phthalocyanine thin films deposited on metal film surfaces 182
X-ray photoelectron spectroscopy
low temperature nitridation of transition metals with hydrazine 106
structural studies of reactively sputtered carbon nitride thin films 44
X-ray scattering
lattice constant determination by grazing incidence diffraction in thin cubic films under thermal strain 39
thermally-induced phase transitions in LB multilayers of lead stearate 198
